

## MSKL MicroSTOR 2.5" SATA enclosures

### MicroSTOR 1

#### 2.5" SATA USB enclosure

The USB port is used for data transfer and power supply. The elegant looking MicroSTOR 2 offers a maximum transfer rate of 480 MB/sec.

- Aluminium enclosure
- Internal: SATA
- External: USB 2.0, up to 480 MB/sec
- Direct connection with USB devices such as cameras, PDAs, card reader, MP3 Player etc. without going through the computer
- Power- and HDD-LED
- Dimensions: 22x13x132mm

### MicroSTOR 2

#### External 2.5" SATA RAID System

Our MicroSTOR is a portable eSATA datastytion!

This small 2.5" RAID unit supports RAID levels 0 and 1 as well as JBOD and BIG.

Operating in level 1, your files are protected by mirroring all data to the second disk. The eSATA interface offers high-speed data transfer to your computer system.

The small dimensions and the low weight offer maximum mobility.

- internal: 2x 2.5" SATA
- external: eSATA
- RAID levels: 0, 1, JBOD, BIG
- Status-LEDs
- 30mm fan
- External 5V power supply

# MSKL MS-3045 3.5" and MiniSTOR 5R-TT RAID Systems

## MS-3045R, MS-3045S

### External 3.5" SATA / SAS RAID Systems

The MS-3045 Raid Subsystem is a cost-efficient and user-friendly alternative for small businesses, your home office, or PC-work-station.

The compact system offers a professional way of data protection with plug&play functionality, user-friendly software for configuration and RAID levels 0, 1, 1+0, 5, JBOD, BIG and Hot Spare.

Automatic system monitoring guarantees highest data security: optical- and email-notification in case of a disk-failure are available.

Due to the HotSwap-capability failed disks can be replaced during operation. New disks will be integrated automatically to immediately guarantee data security.

- internal: 5x 3.5" SATA (MS-3045R), 5x 3.5" SAS (MS-3045S)
- external: eSATA (MS-3045R), SAS (MS-3045S)
- RAID levels: 0, 1, 1+0, 5, JBOD, BIG
- Status-LEDs
- 2x 80mm auto-regulated fan
- Internal 110/220V power supply

## MiniSTOR 5R-TT

### External 3.5" RAID Systems

The MiniSTOR 5R-TT is coupled with a new processing architecture that provides enhanced data protection, high-performance storage, and plug-and-play functionality. Volumes can be created with mirrored drives providing automated data protection along with notifications when a drive needs replacement. Fully populated with two 3.5" SATA-II drives, the MiniSTOR 5R-TT stores as much as 2 Terabyte of data.

The MiniSTOR 5R-TT uses next-generation SATA-II technology, so you can take advantages of new drive features such as native command queuing and hot-plugging, providing enterprise-class performance with ease of use. 3GB/sec SATA-II compatibility is already enabled to take advantage of the next leap in disk drive performance.

- 2 drive-bays for 3.5" SATA disk drives with key-lock-function
- Hot-Swappable, Plug-and-Play
- 3 Gb/s eSATA interface
- 5.25" half-height / table-top
- Automatic negotiation between SATA I (1.5Gbps) and SATA II (3.0Gbps)
- RAID level 0, 1, 0+1 and JBOD
- Status LEDs for RAID Level, Power, Fan Error, Drive Activity and Drive failure
- Serial ATA Port Multiplier 1.1 specification compliance
- eSATA port up to 3.0GB/s
- Plug-and-Play, no drivers needed
- USB 1.1 and USB 2.0 specification compliance
- 60 W power supply auto-sensing
- Physical dimensions (W \* H \* D): 212mm \* 67mm \* 284mm
